## OTHERS

### Cicafresh™

Cicafresh™ is an aqueous gel for the treatment of burns, scalds, sunburn and skin damage caused by radiation. Apply directly to the burn, creating a protective barrier which cools and repairs the skin, this relieving pain. Cicafresh™ is registered as a Medical device.

### RepelPica™

It provides effective and reliable protection for an average of 5 hours against mosquitoes (*Anopheles stephensi*, *Aedes aegypti* and *Culex quinquefasciatus*).

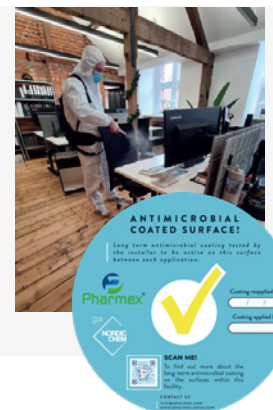

### CAVI-T

The CAVI-T device is a new, asymmetric, low-pressure balloon with European agreement for epistaxis treatment. After nose cleaning, the asymmetric CAVI-T balloon is inserted with the guide placing the marker at the level of the columella. The balloon is inflated with air and then the guide is removed. After 48 hours, the asymmetric CAVI-T balloon can be deflated. After epistaxis is controlled, the balloon is left in place for further 24 hours. With no epistaxis recurrence, the balloon can be withdrawn.

### NORDIC CHEM

Nordic Chem strives to create healthier environments by implementing our revolutionary water-based antimicrobial and antiviral coating. It can be applied to almost any surface which enables a whole new level of protection in any facility. One application of Nordic Chem coating will provide up to 90 days protection against bacteria and viruses.

### Vaselina Pura CUVE

### Supositorios de glicerina CUVE
